

RIDVAN EMRE BAYAR

SOFTWARE DEVELOPER

Istanbul, TR • +90-552-374-1500 • ridvanemrebayar@gmail.com • <https://ridvan-byr.github.io> • github.com/ridvan-byr • linkedin.com/in/ridvanemrebayar

SUMMARY

Software Developer with experience in web development, backend systems, test automation, and AI-powered applications. Skilled in designing and developing scalable software solutions, integrating modern technologies, and delivering reliable user-focused products. Passionate about continuous learning and solving real-world problems through software.

WORK EXPERIENCE

Software Developer Intern (Long-Term) — *iCredible Technologies Inc.*

Feb 2026 – Present

- Developing a full-stack web application using .NET (ASP.NET Core), Next.js, and PostgreSQL.
- Designing and implementing RESTful APIs and integrating them with frontend applications.
- Managing database design, schema migrations, and query optimization in PostgreSQL.
- Containerizing application with Docker to ensure consistent development and deployment environments.
- Using GitHub for version control, collaboration, and code review processes.
- Built & maintained a 39-spec Playwright E2E test suite covering auth, OAuth (GitHub/Bitbucket), 5 cloud storage providers (AWS S3, Azure, GDrive, OneDrive, Huawei OBS), and audit-log validation (POM & API mocking).
- Performing API validation and testing using Postman.

Software Developer Intern — *Routewise*

Jun 2025 – Jan 2026

- Contributed to the development of the official beta version of a responsive web application.
- Developed modern and responsive user interfaces using React.js, TypeScript, and Tailwind CSS.
- Implemented authentication features including login, registration, and password reset.
- Collaborated in a remote team using Git and task tracking tools.

Software Developer Intern — *Setgreet*

Apr 2025 – Aug 2025

- Developed responsive user interfaces using React.js and Tailwind CSS.
- Managed data with MongoDB, including schema design and CRUD operations.
- Collaborated in a remote development environment using Git.

TECHNICAL SKILLS

- Programming Languages:** Java, C++, C#, Python, JavaScript
- Databases & Query Languages:** PostgreSQL, MySQL, Microsoft SQL Server, SQLite
- Frontend Development:** React.js, Next.js, HTML5, CSS3, TailwindCSS
- Backend Development:** .NET (ASP.NET Core), Node.js (Express.js), FastAPI, Flask
- Testing & QA:** Playwright, Postman
- DevOps & Tools:** Docker, Git, GitHub, VS Code

PROJECTS

QA Cortex — *AI-Powered Test Review & Design Platform*

Open Source

- Designed & developed an open-source, repository-aware platform for automated test review and test design.
- Built a deterministic rule engine analyzing test automation projects and producing explainable quality reports.
- Designed a modular adapter architecture supporting Playwright, Selenium, and Python automation frameworks.
- Developed a VS Code extension providing in-editor diagnostics, CodeLens, Code Actions, and quality insights.
- Published on [VS Code Marketplace](https://marketplace.visualstudio.com/items?itemName=ridvanemrebayar.qa-cortex); achieved 100% precision & recall across 40-case benchmark suite.

AI-Powered Project Management System with LLM Agent

Full-Stack Project

- Developed full-stack app with role-based access using Next.js, Express.js, and PostgreSQL.
- Integrated ChatGPT-based LLM agent to automatically summarize tasks and generate intelligent suggestions.

E-Commerce Administration Platform

Full-Stack Project

- Developed full-stack e-commerce admin platform using ASP.NET Core, Next.js, TypeScript, and SQL Server.
- Implemented Firebase Auth, JWT, RESTful APIs, Cloudflare R2 image storage, rate-limiting, and Repository/Service patterns.

EDUCATION & LANGUAGE

Bilecik Şeyh Edebali University — B.S. in Computer Engineering (Graduated: 2026)

English: B2 (Intermediate)
